

*... I would like to thank everyone at OteSound for their service, help and professionalism during the performance of the Brad Mehldau trio at the Janáček theater in March 2014.*

*Despite the lack of access to the house system settings which was out of OteSound responsibility (and which I hope can be solve with the theater in the future), every action has been taken by OteSound to achieve the best possible coverage and even response of the system.*

*I particularly appreciated the cleanliness of the stage and the reactivity of everyone to fulfill all our needs for the performance...*
